# Pupil Premium Support Programme

Supporting under-resourced pupils with preparing for 11+ exams and Key Stage 2 learning

**Kesteven & Grantham Girls' School, The King's School  
and Atom Learning**

# The programme

---

## Narrowing the educational divide with KS2 learning and 11+ preparation support for Pupil Premium pupils

**Kesteven & Grantham Girls' School and The King's School are open to pupils from all backgrounds, and we're proud of our meritocratic environments.**

To encourage even greater representation of children at our schools and support all KS2 children in the area around us, we've partnered with [Atom Learning](#), a leading online 11+ preparation and Key Stage 2 learning platform, to provide all children who are eligible for Pupil Premium with a free programme of Key Stage 2 learning and 11+ familiarisation materials.

This programme is designed to help all children consolidate and master Key Stage 2 learning objectives and, where relevant, familiarise them with the topics they may see on their 11+ test. Our goal is to ensure that all children, regardless of their future aspirations, leave primary school having mastered the KS2 curriculum, and that every grammar school applicant, regardless of their background, goes into their 11+ test feeling confident and able to show their full potential.

**All children who are eligible for Pupil Premium (not just those considering grammar school) will be given free access to the online learning platform Atom Home (normally £575.90 a year).**

## Why have we set this programme up?

---

Despite encouragement from both primary and secondary schools to parents that the best method of entrance test preparation is mastery of the national curriculum, we recognise that the most common method of preparing for the 11+ is still intensive coaching and private tuition. This environment ends up providing some children with a comparative advantage, and ultimately widens the educational divide.

Our goal is to combat this by providing families who wouldn't otherwise be able to afford them with high-quality, reputable test preparation materials. Atom Learning, KGGS and The King's School all advocate for a child-centric approach to learning and revision.

Atom Learning is built around the national curriculum with added resources for reasoning, and is designed to encourage regular, short, focused learning, with the belief that this is the best route for test preparation and long-term success at secondary school.

# What is Atom Home?

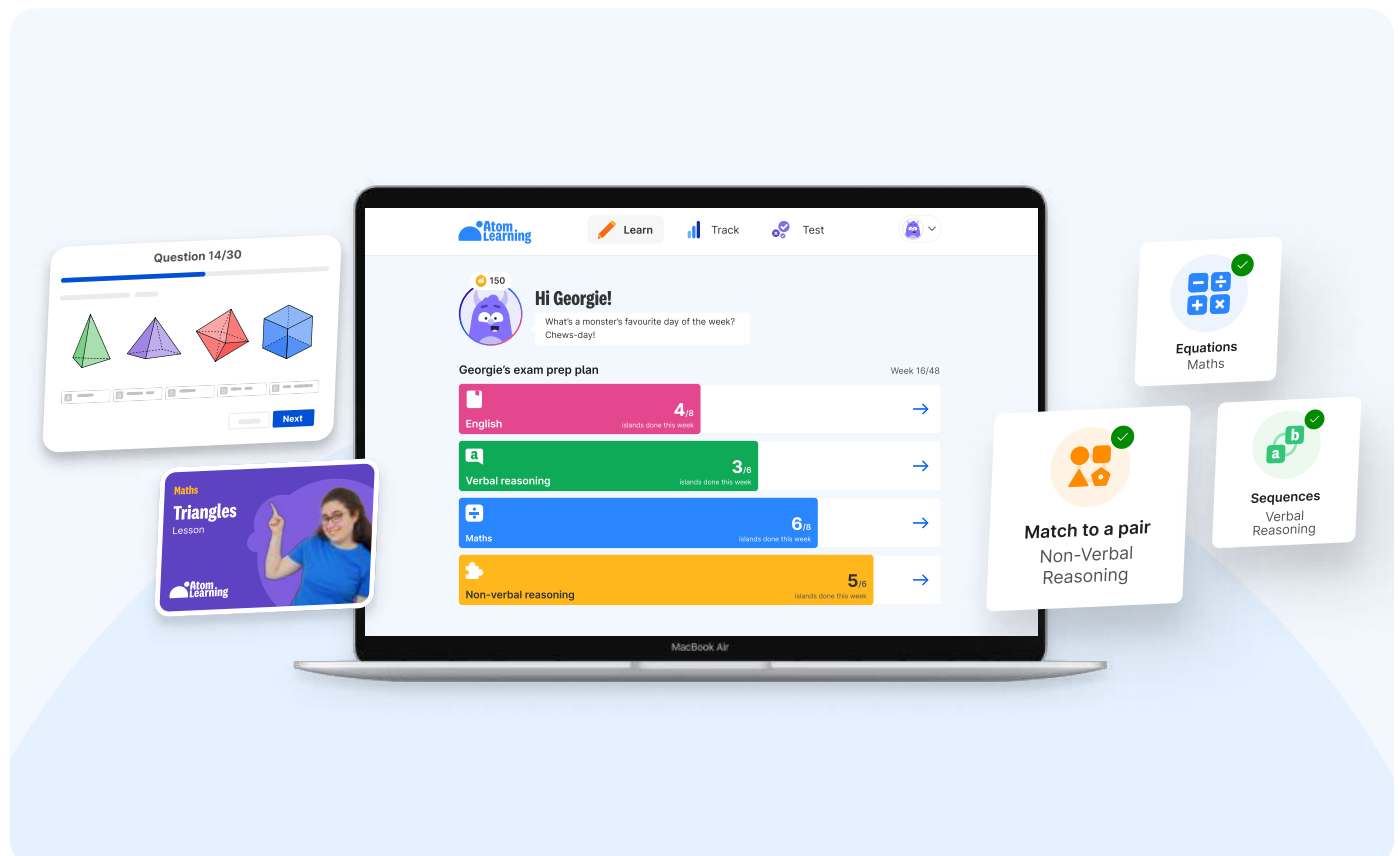

Atom Home is an online learning and examination preparation website for ages 7-11. It is built around national curriculum frameworks, with additional material for reasoning.

Atom Home gives children access to:

- 11+ practice questions across English, mathematics, verbal reasoning and non-verbal reasoning
- KS2 questions across English, mathematics and science
- Learning resources and video tutorials
- Engaging, interactive challenges and puzzles
- Examination practice and mock tests

Atom Home is designed to build children's confidence with Key Stage 2 learning objectives and, where relevant, improve exam technique by familiarising them with the style of questions in grammar school 11+ tests.

It is an engaging, child-centric learning platform, aimed at increasing engagement and motivation with learning.

## How do students access the support?

---

We have designed this process to be as simple as possible for families and schools to reduce barriers to access:

1. Parents and carers whose children are eligible for Pupil Premium fill in the Atom Learning form on one of the schools' websites:

- <https://www.kings.lincs.sch.uk/atom>
- [https://www.kestevengrantham.lincs.sch.uk/key\\_information/admissions/atom\\_learning/atom\\_learning.html](https://www.kestevengrantham.lincs.sch.uk/key_information/admissions/atom_learning/atom_learning.html)

2. Their primary school will receive an email from Atom Learning asking the school to verify the child's eligibility for pupil premium.

3. Once verified, Atom Learning will set the Atom Home account up for each child, and share login information with the parent via email.

### **Flo Simpson, Chief Operating Officer at Atom Learning:**

'At Atom, our mission is to make exceptional education accessible to all and we are truly excited to partner with KGGs and The King's School. This partnership will bring our learning content and technology to even more families. We firmly believe that our platform empowers children to not only excel in their exams, but also to build lasting confidence and pave their path to success throughout Key Stage 3 and beyond.'

### **Simon Pickett, Headteacher at The King's School and James Fuller, Headteacher at Kesteven & Grantham Girls' School:**

'We are delighted to be working with Atom Learning to provide support to KS2 students with their learning. We believe Atom Learning provides an incredible resource that students can use to continue their own learning whilst at the same time providing important preparation work for any who decide to apply and sit the 11+ test. We are delighted that this resource is available for free, to any child who is in receipt of pupil premium funding and the very positive impact regular use can have for each learner as they progress in KS2 and move onto KS3.'

If you have any questions or would like to find out more about Atom Learning, please email [hannah.porter@atomlearning.co.uk](mailto:hannah.porter@atomlearning.co.uk)
